// Experience

2011-2013 **Logistics Trade International** Computer Technician

Proposed technical feasibility solutions for new functional designs and suggested options for performance improvement of technical objects. Diagnosed and troubleshooted Windows problems and applied solutions to increase company efficiency.

2014-Current **Hewlett-Packard** Software Developer

Worked with a big team of developers to brainstorm and implement ideas for a better way to manage devices for small companies. Primarily worked with Ruby on Rails but was named "UI Champion" of my team. Meaning any frontend work would be passed to me.
